Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on September 14, 2006 {Prelimin. Amendment}.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 1626

DETAILED ACTION

Claims 18-33 are pending in the application. This Office Action supercedes the Office Action dated September 27, 2007 since the Preliminary Amendment filed September 14, 2006 was not taken into consideration when the previous Office Action was prepared.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 18-26, drawn to a process for preparing fluoromethyl-substituted heterocycles of

Art Unit: 1626

formula (I) wherein A is a pyrazole ring which is substituted by R⁴.

Group II, claim(s) 18-26, drawn to a process for preparing fluoromethyl-substituted heterocycles of formula (I) wherein A is a thiazole ring which is substituted by R⁴.

Group III, claim(s) 18, 19 and 22-26, drawn to a process for preparing fluoromethyl-substituted heterocycles of formula (I) wherein A is an oxazole ring which is substituted by R⁴.

Group IV, claim(s) 27 and 28, drawn to a process for preparing fungicidally active carboxamides of formula (VII) wherein A is a pyrazole ring which is substituted by R⁴.

Group V, claim(s) 27 and 28, drawn to a process for preparing fungicidally active carboxamides of formula (VII) wherein A is a thiazole ring which is substituted by R⁴.

Group VI, claim(s) 27 and 28, drawn to a process for preparing fungicidally active carboxamides of formula (VII) wherein A is an oxazole ring which is substituted by R⁴.

Group VII, claim(s) 29-31, drawn to chloromethyl-substituted heterocycles of formula (II) wherein A is a pyrazole ring which is substituted by R⁴.

Group VIII, claim(s) 29, 32 and 33, drawn to chloromethyl-substituted heterocycles of formula (II) wherein A is a thiazole ring which is substituted by R⁴.

Art Unit: 1626

Group IX, claim(s) 29, drawn to chloromethyl-substituted heterocycles of formula (II) wherein A is an oxazole ring which is substituted by R⁴.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

The claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds claimed contain a chloromethyl-substituted heterocycle ring which does not define a contribution over the prior art (see, for example, the compound of CA Registry No. 123374-32-3, in CA 111:194759, 1989). The substituents on the chloromethyl-substituted heterocycle vary extensively and when taken as a whole result in vastly different compounds. Accordingly, unity of invention is considered to be lacking and restriction of the

Art Unit: 1626

invention in accordance with the rules of unity of invention is considered to be proper.

Additionally, the vastness of the claimed subject matter and the complications in understanding the claimed subject matter imposes a burden on any examination of the claimed subject matter.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be

Art Unit: 1626

accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election

Art Unit: 1626

of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura L. Stockton whose telephone number is (571) 272-0710. The examiner can normally be reached on Monday-Friday from 6:15 am to 2:45 pm. If the
